---

---

It is the bidder's responsibility to assure that all items meet the following criteria. Items delivered to an agency not in accordance with these criteria will be subject to return at the Contractor's expense and possibly other legal action.

Any peripheral devices such as printers, scanners, and other items of significant cost must be legally labeled as the brand name specified in the contract. In certain cases, this would require that there be a legal agreement between the original equipment manufacturer and the private label distributor, allowing the private label distributor to label and market the product as the brand specified.

- Example: On a contract for ABC Brand Name Peripherals, a system could not include a monitor labeled "IBM" or a printer labeled "Epson". An agreement would have to exist which would allow ABC Company to market these products and label them as ABC Brand.

All bidders must be authorized by the manufacturer to sell the products bid. The bidder must also provide service through a manufacturer's authorized service supplier. If the bidder is not the authorized service supplier, he must submit the name of the third party Contractor that would perform all services needed. Successful bidder will be responsible for the work of the third party Contractor. The Office of State Purchasing will verify these authorizations. The Division of Administration reserves the right to require any current documentation to substantiate any third party Contractor's relationship with the manufacturer.

All documentation requested in this invitation to bid should be provided with your bid. Any documentation, verification or clarification requested during the evaluation must be provided by the date required in the request. Failure to provide the requested information in the time allotted may eliminate your bid from consideration.

The following check list is provided for your convenience. Failure to provide the information requested in the time allotted may cause your bid to be rejected.

1. Sign and Complete bid document (see page 1)

At no time does this relieve the contract vendor of his responsibility to any and all requirements that the Office of State Purchasing has in place for Brand Name Microcomputer Contracts. Although third party warranty service providers are acceptable, this is not the preferred method of warranty repair and support. However, if a third party warranty provider(s) is utilized, it is incumbent on the contract vendor to provide evidence of the designated service provider's compliance to number two (2) below.

2. The Contractor or the designated third party service provider(s) shall utilize A+ certified service technicians or manufacturer's trained service technicians to fulfill the warranty and service needs of contract equipment. Manufacturer's training must be for the brand name equipment as specified. The Contractor is required to furnish the Office of State Purchasing proof of all training. In addition, if a unit fails within seven (7) days of satisfactory installation (if vendor-installed) or within seven (7) days of delivery (if State installed), the entire unit will be replaced by the Contractor unless the standard manufacturer's warranty provides for repair of the unit, in which case, the Contractor may provide on-site repair service at no additional cost, to the extent that the standard manufacturer's warranty differs from the foregoing minimum requirements for the State required warranty, the State's minimum requirements shall prevail. The state will accept any warranty that exceeds these minimum requirements.

The above stated warranties shall be voided and shall terminate if the equipment system components are modified or altered by other than the authorized Contractor personnel.

Any damages to the original equipment caused by State added components shall void the warranty, and repair of said unit becomes the responsibility of the State.

Re-certification of warranty shall then be negotiated between the State and the Contractor. The warranty does not cover defects or damage not caused or occasioned by the Contractor.

State/Contractor may verify machine condition or warranty through removal of any or all of the components added following initial procurement of the system.

The Contractor may use a third party warranty provider when demand for support or repair is greater than that which the Contractor's "in-house" support team can provide. Neither party shall be liable for lost profits, lost revenue or lost institutional operating savings.

The State may, in addition to other remedies available to it at law or equity and upon notice to the Contractor, retain such monies from amounts due Contractor, or may proceed against the performance and payment bond, if any, as may be necessary to satisfy any claim for damages, penalties, costs and the like asserted by or against them.
